

Trip to: Chihlee University Taiwan

My favorite part of our trip

I most enjoyed the moment when we went to JiuFen we walked along the old street, we saw the old theater, had delicious food and amazing views.

3 *new* things I learned

1 | I learned about the
Jinshan Potatoe
Garden

2 | Yehliou Geopark

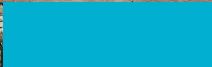

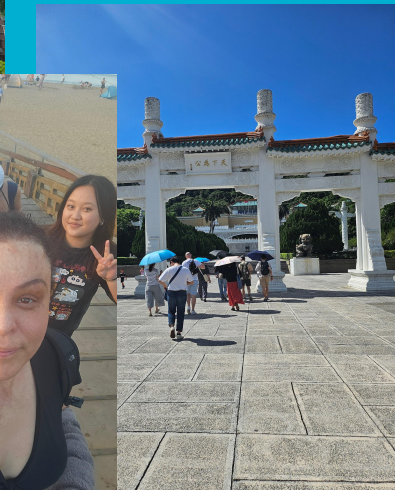

3 | Fire Fishing

3 other facts I learned from *researching*

1. **Jinshan Potatoe Garden** is a goverment funded program to help local farms grow .
2. **Yehliou Geopark** has many strange-looking rocks. One of its most precious attractions is The Queen's head which is a rock formation that looks like a queen's head, because these are the results of erosion the queen's head is to be expected to fall soon.
3. **Fire Fishing** This is a unique technique of fishing only found in Taiwan and is done by igniting a volcanic rock once lit it will attract fish.

Taiwan

...is where I'd like to go next!
